

Colin Shea

*SELF-TAUGHT PROGRAMMER, SYSADMIN, AND DEVOPS
EXPERT*

colin@shea.at
<http://evaryont.me/>
(301)-337-7181
Phoenix, AZ
USA

Technical Skills

Mastery of: **Linux, Ruby, Chef, Python, Puppet, git**

Proficient at: Java, AWS, HTML, XMPP/Jabber, Ansible, Salt

Knowledge of: Go, HTML, JavaScript, Elixir, VMWare

Experience

The Evogi Group - <http://www.evogi.com/>

September 2013 - June 2015

Lead System Administrator

Configuration, monitoring, and deployment of 1,000+ Ubuntu and CentOS servers in AWS running Ruby on Rails, Java, Erlang and Go applications.

- Transitioned from a monolithic server architecture to a multi-tiered architecture
 - Spearheaded the first and subsequent international deployments
 - Revamped the authentication and structure for the internal admin panel of the Rails code base
 - Modernized configuration management and deployment using Chef 12
-

Cummings Engineering Consultants

January 2012 - April 2013

System Administrator

Configuration, monitoring, and deployment of servers across the world in a hybrid cloud running Java applications.

- Migrated servers from manual setup to configuration management using Puppet
 - Developed policies to secure our servers to our client's (NSA) standards
 - Located and decided on international targets to expand the network to fulfill ultra-low latency demands
-

[University of Advancing Technology -](https://www.uat.edu/)

August 2011 - December 2011

<https://www.uat.edu/>

Intern

Helped out with networking and Linux related tasks in the IT department.

- Answered staff's and student's questions
 - Deployment of new Cisco routers and switches
 - Management of Fedora machines, integrated with Active Directory and Exchange, to let non-technical students experience Linux for the first time
 - Upgraded the network security lab, isolating it from the rest of the network to ensure regular client machines wouldn't be affected
-

[\[Buffer\]Overflow - http://root-the-box.com/](http://root-the-box.com/)

January 2011 - October 2011

Chairman of the Root The Box Committee

As chairman, it was my responsibility to manage the committee with weekly status meetings.

</> Projects

[cattle-ranch](https://github.com/evaryont/cattle-ranch) - <https://github.com/evaryont/cattle-ranch>

June 2014 - Present

Wrapper cookbooks and recipes to automate building & managing my network

[mousehole](https://github.com/evaryont/mousehole) - <https://github.com/evaryont/mousehole>

September 2005 - August 2009

An HTTP proxy written in Ruby to allow users to change the web to their preferences

[arson](https://github.com/evaryont/cattle-ranch) - <https://github.com/evaryont/cattle-ranch>

April 2008 - August 2009

A download-only tool to help Arch users install packages from the AUR
